

Website Design Brief: The Bedroom Chapters

1. Who we are

An online bedroom store for Nigerians. We sell everything that goes in a bedroom — bedsheets, pillows, rugs, mirrors, diffusers, towels, lamps, storage, nightwear, mosquito nets, and more.

Our long-term brand idea is "The Bedroom Chapters"—the concept that every life stage (newborn, teen, newlywed, senior, recovery) needs its own bedroom setup. But right now, we need to sell bedroom items immediately while planting that brand idea.

2. The immediate goal

Drive sales of bedroom products within 48 hours of launch. No complex storytelling that slows down the buy button.

3. The brand goal (light touch)

Let shoppers discover that we organise products by life stage, so they remember us when they or someone they know hits a new chapter.

4. What we sell:

Core (high volume, fast turnover):

- Bedsheets (single, double, queen, king — fitted, flat, duvet covers, pillowcases)
- Duvets/comforters/blankets/throws
- Pillows (fibre, foam, memory foam, orthopaedic, wedge)
- Mattress protectors/toppers
- Towels (bath sheets, hand towels, face towels, towel sets)

Room dressing (impulse buys, good margins):

- Rugs & bedside carpets
- Curtains & blackout curtains
- Mirrors (full-length, vanity, wall, LED)
- Wall art/frames/decals
- Cushions & decorative pillow covers
- Diffusers, scented candles, room sprays
- Vases, bedside trays, small decor

Function (Nigerian necessity):

- Mosquito nets (treated, pop-up, canopy)
- Rechargeable bedside lamps/reading lights
- Rechargeable fans (clip-on, standing, mini)
- Extension cords/bedside power organisers
- Storage (under-bed boxes, ottomans, laundry hampers, wardrobe organisers)
- Alarm clocks/sleep masks/ear plugs

Comfort:

- Nightwear (pyjamas, robes, lounge sets, sleep socks)
- Slippers/house shoes
- Hot water bottles/heating pads

Furniture:

- Bedside tables/nightstands
- Small wardrobes/clothing racks
- Dressing tables/vanity sets

Site structure (We hope to keep it simple)

This is purely your discretion

Homepage

- Hero:

"Everything your bedroom needs." Big search bar. Two clear paths:

Shop by product | shop by chapter

- Below: Bestsellers (8–12 products). Shop high-quality bedsheets from ₦6,500 — price-forward.

- Below that: The chapter teaser (9 small cards: Nursery, Teen, Newlywed, etc.). Clicking one filters products for that stage.

- Trust bar: Pay on delivery · Lagos same-day · 7-day returns

Shop page

- Filter sidebar: Category, Price, Size, Colour, Chapter

- Grid view. Product card = image, name, price, "Add to cart"

- No wishlist. No compare. No complexity.

Product page

- Large images (3–4)

- Price + size selector + quantity

- "Add to cart" (sticky on mobile)

- Short bullet description (fabric, care, what's included)

- "Complete the look" — 3 related products

- Delivery estimate by location

- Reviews

Chapter pages (9 pages, same template)

- Headline: "The [Chapter] Bedroom"

- 2-sentence intro

- Curated product grid (12–20 items)

- Bundle offer at bottom

Cart & Checkout

- Cart slide-out (not a new page)
- Checkout: Name, Phone, Address, Delivery option, Payment method
- Payment: Paystack (card/transfer/USSD) + Pay on Delivery (Lagos/Abuja/PH, under ₦50k) which cash already transferred and held in escrow.

Other pages

- About (short)
- Delivery & Returns
- Contact / WhatsApp button (floating)
- Journal (blog — 5 articles to start, for SEO)

6. Design direction (discretion-based)

- Clean, white, uncluttered. - The product photos are the colour.
- Mobile-first. 90% of traffic will be on phones.
- Fast. Under 3 seconds to load on 3G.
- Animations could be used to show what a room look like but later maybe?.
- Typography: One font. Two weights (regular, bold). One-size hierarchy.
- Colours: Black text, white background, and one accent colour (sage green or warm sand) for buttons and "Pay on Delivery" trust badges.
- Photography: Real Nigerian bedrooms. Natural light. Products on actual beds, not floating on white.

Technical requirements

- WhatsApp: Floating button on every page. "Chat to order" — routes to WhatsApp Business with a pre-filled message.
- SEO basics: Auto meta titles, fast load, mobile responsive, product schema.
- Analytics: Google Analytics 4, Meta Pixel, Hotjar (free tier).

8. What we may NOT build now

- No account/login required to buy (guest checkout only)
- No wishlist
- No loyalty points (yet)
- No subscription model (yet)
- No AI chatbot
- No currency switcher
- No multi-language (English only for now)
- No app (responsive site only)

Success metric

First sale within 48 hours of launch. Ten sales in week one.

The idea I am going for is a fast, clean, mobile-first product catalogue that lets a Nigerian scroll, add to cart, and check out in under 60 seconds. The "chapters" brand should feel like a helpful organising principle, not a barrier to buying a bedsheet.
